

Удаляем "Powered by Kunena forum"

Взято тут: <http://joomlaforum.ru/index.php/topic,82011.0.html>

1.7.x

Ищем вот такой кусочек

```
// Credits
    echo '<div class="kcredits kms"> ' . CKunenaLink::GetTeamCreditsLink (
$catid, JText::_('COM_KUNENA_POWEREDBY') ) . ' ' .
CKunenaLink::GetCreditsLink ();
    if ($this->params->get('templatebyText') != '') :
    echo ' :: <a href ="' . $this->params->get('templatebyLink') . '"'
rel="follow">' . $this->params->get('templatebyText') ;
    if ($this->params->get('templatebyName')) {
    echo ' '.$this->params->get('templatebyName') . '</a>';
    } else { echo '</a>'; }
    endif;
    echo '</div>';
```

и просто комментируем:

```
// Credits
/*
    echo '<div class="kcredits kms"> ' . CKunenaLink::GetTeamCreditsLink (
$catid, JText::_('COM_KUNENA_POWEREDBY') ) . ' ' .
CKunenaLink::GetCreditsLink ();
    if ($this->params->get('templatebyText') != '') :
    echo ' :: <a href ="' . $this->params->get('templatebyLink') . '"'
rel="follow">' . $this->params->get('templatebyText') ;
    if ($this->params->get('templatebyName')) {
    echo ' '.$this->params->get('templatebyName') . '</a>';
    } else { echo '</a>'; }
    endif;
    echo '</div>';
*/
```

2.0.x

Редактируем файл /administrator/components/com_kunena/libraries/view.php

Ищем функцию «function poweredBy» содержащую вот такие строки:

```

final public function poweredBy() {
    $credits = '<div style="text-align:center">';
    $credits .= JHTML::_('kunenaforum.link',
'index.php?option=com_kunena&view=credits',
JText::_('COM_KUNENA_POWEREDBY'), '', '', 'follow', array('style'=>'display: inline; visibility: hidden; text-decoration: none;'));
    $credits .= ' <a href="http://www.kunena.org" rel="follow"
target="_blank" style="display: inline; visibility: hidden; text-decoration: none;">'.JText::_('COM_KUNENA').'</a>';
    if ($this->ktemplate->params->get('templatebyText')) {
        $credits .= ' :: <a href ="'.
$this->ktemplate->params->get('templatebyLink').'" rel="follow"
target="_blank" style="text-decoration: none;"> ' .
$this->ktemplate->params->get('templatebyText') .' '.
$this->ktemplate->params->get('templatebyName') .'</a>';
    }
    $credits .= '</div>';
    echo $credits;
}

```

Заменяем все

```
visibility: visible;
```

на

```
visibility: hidden;
```

или, что гораздо проще вообще все удаляем:

```

final public function poweredBy() {

}

```

forum, kunena, remove, powered by kunena, убрать, работает на
